

LMCA APPROVED PAINT -- McCormick Colors

Landmark Mews uses the McCormick Exterior Color Chart for reference (see mccormickpaints.com), but homeowners are not required to use McCormick paints. Exterior paint from any company is perfectly acceptable provided it is mixed to the approved McCormick color formula.

Please note that McCormick periodically revises its palette. If the color you want is not on the current McCormick list, it can be mixed from the color number. If you would like to use a new McCormick color not on this approved list, the Committee will consider it.

“BASE COLOR” refers to the color to only to be used on windows, garage door [including frame], dormers, front entrance packages, sliding doors, clapboard siding, soffit, cornice, and fascia.

“SHUTTER/DOOR COLOR” refers to colors only used on shutters or front entry doors.

For more guidance, see the LMCA Architectural Standards.
